

## Crock Pot Trio Cook and Server

In preparation of Valentines Day, last week I bought one of the Crock Pot Trio Cook and Server and it seems to be just perfect for my cooking needs. I have a bad experience with most of the ordinary cooking pots and buffet servers which I have bought previously. Most of them lack reliable heat regulators and at times you think that you have regulated it to 'low' only to later find that it is acting as the 'high' or vice versa. The Crock Pot Trio Cook and Server has really come to my rescue and in fact after I bought it, I had to carry out a test by heating water in it to see whether the heat regulators certainly worked the way they should. They were just perfect and I only hope that they will continue functioning the same way. I also found out that you can also heat your food at amazingly high degrees of up to 200 degrees. This is very cool for guys who enjoy their food when it is overcooked.

Besides, the amazing heat regulating abilities, I also fell in love with the 3 quart capacity. Most buffet servers have the 2.5 quart which makes Crock Pot Trio Cook and Server uniquely awesome. I love cooking and for sure it is one of my hobbies and the 3 crock pots now allow me to do all the cooking I can possibly imagine. In one crock pot I can cook the main dish, a side item in the second and a dessert in the third.

My kitchen is pretty big and the six foot electrical cord that comes with it was perfect for the job. I can now place the cooker in any location inside my kitchen without worrying that the cord will not extend enough. Moreover; it saved me the trouble of finding an electrician to increase the cord which mostly has carries its own hazards.

I love the Crock people on the fact that they have made it easy to wash the Crock Pot Trio Cook and Server. When washing dishes, am always worried of breaking any earthenware or stoneware items but having the dishwasher removal ability when cleaning the Crock Pot Trio Cook and Server, my worries have been taken care of. I am able easily to clean the Crock Pot Trio cook and server by first removing the stoneware and the glass lid.

When was buying the Crock Pot Trio Cook and Server I made sure that I didn't forget the spoon notches with 3 serving spoons which is part of the whole package. I think this is more than cool; three serving spoons for each of the three crock pots. In fact I went back to the Crock people to ask them whether they could sell me more of these serving spoons but they told me that they have them as some kind of "Thank you gift" for their buyers. The spoons are just more than strong!

As a cooking aficionado, I think Crock Pot Trio Cook and Server is the best advance Valentines Day gift I have ever bought myself.
